

Claim Listing

- 1-12. (Canceled)
13. (Previously presented) A method of treating anxiety in a patient in need thereof comprising administering an effective non-toxic dose to the patient of a compound of the formula:
- The chemical structure of wogonin is shown. It consists of a coumarin core (a benzene ring fused to a five-membered lactone ring). The 7-position of the coumarin ring has a hydroxyl group (-OH). The 4-position has a methoxy group (-OCH₃). The 6-position is substituted with a phenyl group.
14. (Previously presented) The method of Claim 13, wherein the dose administered to the patient is from about 0.15 mg/kg to about 1.0 mg/kg.
15. (Previously presented) The method of Claim 13, wherein the dose is administered in a single aliquot.
16. (Previously presented) The method of Claim 13, wherein the dose is administered in two or more aliquots.
- 17-18. (Canceled)
19. (Original) A method of treating anxiety in a patient comprising administering an effective non-toxic dose of wogonin to the patient.

20. (Previously presented) A method of treating anxiety in a patient in need thereof comprising administering to the patient from about 0.1 mg/kg to about 10.35 mg/kg of a compound of the formula:

21. (Previously presented) The method of Claim 20, wherein the compound administered to the patient is from about .8 mg/kg to about 3.3 mg/kg.
22. (Previously presented) A method of treating anxiety in a patient comprising administering a dose from about 0.1 mg/kg to about 10.35 mg/kg of wogonin to the patient.
